Technical Skills

Languages & Frameworks: Python, SQL, C#, JavaScript, React, Node.js, FastAPI, Flask, Django

NLP & LLMs: BERT, GPT-4, T5, Llama, spaCy, NLTK, LORA, QLORA, NER, Fine Tuning, Hyperparameter Tuning, semantic search

Databases: PostgreSQL, My SQL, NoSQL, MongoDB, Neo4j, Redis, MaxDB, Snowflake, Chromadb, FAISS, Weaviate, Pinecone

Machine Learning & AI: Scikit-learn, XGBoost, AdaBoost, LightGBM, TensorFlow, PyTorch, Hugging Face Transformers, LangChain, LangGraph, LangSmith, LlamaIndex, Third Party API, Prompt Engineering, RAG, MLflow, Azure ML, AWS SageMaker, Databricks

Big Data & Data Engineering: Apache Spark, Apache Kafka, Airflow, ETL, Pandas, NumPy

DevOps & Cloud: Docker, CI/CD (GitHub Actions), AWS, Azure, Google Cloud Platform (GCP)

Monitoring & Visualization Tools: Power BI, Tableau, Looker, Prometheus, Grafana

Other Skills: Data Science, Data Analysis, Data Modeling & Engineering, Gen-AI, Computer Vision OpenCV, DevOps, A/B Testing

Experience

Tesseract Technologies

Jan 2024 – Present

Data Scientist & AI/ML Engineer

Lahore, Pakistan

- **Prompt Privacy:** Designed end-to-end architecture for **Prompt Privacy** with **Neo4j graph** modeling, secure third-party integrations (**Gmail, OneDrive, SAP etc.**), and automated ingestion pipelines. Implemented **OCR (PaddleOCR)**, **STT (Whisper)**, LLM-based **summarization, classification, prompt generation, semantic/syntactic retrieval (SentenceTransformers, RAG)**, **BERT, third party llms (GPT, Gemini, Claude etc.)** and ML inference. Built identity, privacy, and subject managers for enriched profiles, **Personally Identifiable Information (PII) detection**, entity resolution, compliance insights, and contract metadata. Developed validation, pruning, and backup systems ensuring **data quality, deduplication, version control**, and recovery.
- **Crypto Price Prediction with LSTM:** Built a **multivariate LSTM model** for **time series forecast BTC** (OHLCV data) open prices using **Binance API**. Streamed **real-time crypto data** via **Apache Kafka** and **preprocessed with Apache Spark** for feature engineering and time windowed training. Orchestrated workflows with **Apache Airflow**, **evaluated performance (MAPE, MAE, RMSE)**, and integrated US business day logic for **realistic forecasting**. Visualized **actual vs predicted** trends for better insight.
- **AI-Powered Document Processing:** Developed **Claustro.io**, educational platform **powered by GPT-3.5-Turbo**, enabling personal tutoring, **voice-based learning (Whisper STT, Coqui TTS)**, AI-driven assessments, and dynamic content generation. Developed modular FastAPI services for **chatbot, STT/TTS, grading, plagiarism detection, tesseractOCR, and video summarization**. Quiz creation and generated narrated **videos from PDFs/DOCX**, enhancing accessibility and personalized education.

ITSOLERA

Mar 2022 – Jan 2024

Data Scientist & AI/ML Engineer

Islamabad, Pakistan

- **Predictive Analytics & Data Automation:** Improved **forecasting accuracy by 20%** and efficiency by **15%** with **ML/DL models**. Built **ETL pipelines using Apache Spark & Airflow** for preprocessing, feature engineering, and model orchestration. Integrated **Apache Kafka** for **real-time streaming** of financial transactions, enabling low-latency **anomaly detection and fraud prevention**.
- **AI Image Generation:** Built a **Streamlit** based application **integrating StyleGAN2-ADA** for real time **face generation, style manipulation, and latent space interpolation**. Enabled **GPU accelerated processing**, session managed state, and automatic image saving to enhance **user interaction and experimentation** with **generative models**.

UET (KICS Department)

Sep 2020 – Mar 2022

Data Scientist & AI/ML Engineer

Lahore, Pakistan

- **AI-Powered Financial Planner:** Developed an AI-driven financial planning tool that analyzes **income, expenses, and investments** to provide **personalized financial advice**. Implemented **regression models** for **budget optimization and future expense prediction**, enhancing financial decision-making.
- **Chatbot with Web scraping and LLM integration:** Developed a chatbot with web scraping using **Requests and BeautifulSoup**. Proficient in **Transformers, Ngrok, Pandas, Flask, and NLP tasks** (text generation, translation, sentiment analysis, NER) using Hugging Face and open source **Llama model**. **Integrated and fine-tuned NLP models** for high accuracy and deployment.
- **Movie Recommender System:** **Pandas, NumPy, Tensorflow, Pytorch, Keras, and Scikit learn** for data processing and similarity calculations. Develop custom recommender function utilizing **CountVectorizer** and **cosine similarity** to suggest **top 5 movies based on user input**.
- **License Plate Recognition (LPR):** Developed a **deep learning AI-Powered based LPR** using **Python, YOLOv8, and EasyOCR**. Applied **object detection** and **optical character recognition (OCR)** techniques to achieve **high-precision real-time LPR**. Optimized model performance for **accuracy and scalability** in **real-world applications**.

Deployment, Monitoring & MLOps

- **Deployed ML/DL models with Docker:** Implemented CI/CD (GitHub Actions), experiment tracking (MLflow), real-time monitoring (Grafana + Prometheus), automated workflows (Airflow), apply A/B testing, and large-scale retraining with Apache Spark.

Education

Superior University

Bachelor of Science in Information and Technology

Sep 2018 – July 2022

Lahore, Pakistan
